Chronology

The following is a representative selection of Smithsonian events during fiscal year 1992.

October

■ *Education Program* Cooper-Hewitt, National Museum of Design began a series of one-day design career programs that gave high school students the opportunity to explore social issues and participate in design activities with professional designers. The series continued through March.

October

■ *Smithsonian Sesquicentenary* The Office of the Assistant Secretary for External Affairs began coordination of the Smithsonian's 150th anniversary commemoration, to be held in 1996.

October

■ *International Meeting* The Office of International Relations, in cooperation with the University of California Consortium on Mexico and federal agencies, participated in the steering committee meeting of the U.S.–Mexico Foundation for Science. Assistant Secretary for External Affairs Thomas E. Lovejoy is a member of the committee.

October

■ *Public Programs* The Visitor Information and Associates' Reception Center initiated Spanish-language tours of the Smithsonian Institution Building.

October

■ *Publications* Two recent Smithsonian Institution Press books—*Women of Deb Kob* and *The Mystery of Comets*—were issued in German and Italian translations. Paperback editions of *The Lawmen* and *Women of Deb Kob* were released in the United States by Viking Penguin.

October

■ *Radio Series* “Folk Masters”—produced by the Office of Telecommunications' Radio Smithsonian, Carnegie Hall, and the Washington public radio station WETA-FM—was inaugurated, broadcast over public radio stations nationwide. It subsequently won the Corporation for Public Broadcasting's Gold Award.

October

■ *Tour* Archives of American Art members explored the art and architecture of Spain and Portugal. The journey to Barcelona, Madrid, Leon, Santiago, Oporto, and Lisbon included visits to private collections and special tours of the sights and treasures in each city.

October

■ *Publication* The Smithsonian Institution Libraries' catalog of the National Museum of African Art branch holdings was published with more than 17,000 records derived from SIL's on-line computer records.

October

■ *New Archive* Cooper-Hewitt, National Museum of Design established an African American Design Archive, a computerized compilation of African American designers' biographies.

October

■ *Special Event* The Viking voyages to the New World were commemorated at the National Air and Space Museum with the queen of Norway and the president of

Iceland in attendance. The event was facilitated by the Office of the Assistant Secretary for External Affairs.

October

■ *Education Program* As part of the Cooper-Hewitt, National Museum of Design's innovative "designer-in-residence" program, noted industrial designer Bruce Hannah began four months at the museum teaching school groups about design.

October–May

■ *Education* Assistant Secretary for Education and Public Service James Early and Ann Bay, director of the Office of Elementary and Secondary Education, represented Smithsonian interests in the Federal Coordinating Committee for Science Engineering and Technology's Committee for Education and Human Resources, which met several times during the year.

October–September

■ *Grants* Throughout the year, the Smithsonian ethnic, women's, and advocacy committees received support from the Educational Outreach Program to organize pan-Institutional events for federally designated commemorations. The program is administered by the Office of the Assistant Secretary for Education and Public Service.

October 1

■ *Staff Appointment* Paul Colinvaux, a well-known ecologist and former professor at Ohio State University, joined the scientific staff at the Smithsonian Tropical Research Institute.

October 1

■ *Internships* The Office of Fellowships and Grants selected seven minority interns for the fall term.

October 5

■ *Award* Assistant Secretary for External Affairs Thomas E. Lovejoy and Office of Environmental Awareness Director Judith Gradwohl accepted the second annual Swim Environmental Awareness Award for the office's oceans forum and exhibition.

October 8

■ *Exhibition* "Recent Acquisitions: 1989–1991" opened at the Hirshhorn Museum and Sculpture Garden, reflecting the strengthening of the museum's collection with more than 80 paintings, sculptures, and works on paper acquired as gifts or purchases.

October 10

■ *Exhibition* The Archives of American Art New York Regional Center Gallery, with Leo Castelli Gallery, presented the exhibition "Lichtenstein/Castelli," featuring original works by Lichtenstein and a variety of materials culled from the Archives' Lichtenstein collection. A preview benefit, "A Salute to Roy Lichtenstein," opened the exhibition.

October 16

■ *Lecture Series* In conjunction with the Hirshhorn Museum's exhibition program, "Focus: Saint Clair Cemin" kicked off a series of free early-evening talks offering perspective on a current exhibition. Among the speakers were artists Saint Clair Cemin, Alfredo Jaar, Tim Rollins and K.O.S., and Francesc Torres, as well as organizing curators Neal Benezra, Frank Gettings, Phyllis Rosenzweig, and Director James T. Demetron.

October 18

■ *Speech* W. Richard West, Jr., director of the National Museum of the American Indian, addressed more than 2,000 people at the annual meeting of the Alaska Federation of Natives in Anchorage.

October 21

■ *Course* The eight-week Resident Associate Program course "France Today" opened with an address by the ambassador of France and featured columnist Jim Hoagland and architect I. M. Pei.

October 21–31

■ *Workshops* "The Identification of Early Synthetic Dyes on Historic Textiles: Analysis and Preparation" and "Advanced Dye Analysis," two Conservation Analytical Laboratory workshops, were organized by Senior Textiles Conservator Mary Ballard and taught by renowned dye chemist Dr. Helmut Schweppe.

October 23

■ *Board Appointment* Jerry I. Speyer, business executive and collector from New York City, was elected to the Hirshhorn Museum and Sculpture Garden's 10-member Board of Trustees, replacing philanthropist Agnes Gund.

October 27

■ *Research* The Office of Printing and Photographic Services conducted a Research Expedition Program with the Smithsonian National Associate Program, "Cataloging Laser Discs."

October 31

■ *Exhibit* The Office of Public Affairs completed the fifth and final version of a multicultural portable traveling exhibit on the theme "The Smithsonian Is For Everyone" for use by Smithsonian staffers attending conferences. The exhibit features three teenagers in the National Air and Space Museum. The other four versions show African American, Asian American, Latino, and Native American people and objects. The exhibits, funded by the Educational Outreach Program and the Special Exhibition Fund, were used many times during the year.

October 31–November 4

■ *Festival* The first U.S. Virgin Islands Folklife Festival took place on St. Croix, U.S.V.I., with collaboration and support from the Center for Folklife Programs and Cultural Studies. The program, originally produced for the Smithsonian's 1990 Festival of American Folklife, involved Senegalese folk artists and the Freedom Singers.

November

■ *Award* The Smithsonian Collection of Recordings received a platinum disc from Sony Records for sales of 500,000 albums of *Classic Jazz*.

November

■ *Report* The National Museum of the American Indian issued "The Way of the People," a historic document that blends technological design and cultural sensitivity in a plan for the acquisition of programmatic information. The report summarized the views ex-

pressed by some 450 representatives of Indian tribes in 11 consultations.

November

■ *Workshop* The Smithsonian Institution Traveling Exhibition Service and Time Warner Inc. hosted an educational workshop in Washington, D.C., for national museum exhibitors and sponsors associated with the major photography exhibition, "Songs of My People," which opened at Washington's Corcoran Gallery of Art in February.

November

■ *Fellowships* The Office of Fellowships and Grants awarded four fellowships under the Smithsonian Institution–University Programs in Structure and Evolution of Terrestrial Ecosystems funded by the Andrew W. Mellon Foundation.

November–May

■ *Research* Flights of a far-infrared spectrometer built by the Smithsonian Astrophysical Observatory contributed new information on ozone depletion.

November 1

■ *Exhibition* "Ralph Earl: The Face of the Young Republic" opened at the National Portrait Gallery. The first exhibition devoted to the talented portrait painter of the new American Republic contained more than 60 paintings, including works by artists whom he influenced.

November 1

■ *Grant* The Office of Printing and Photographic Services was awarded an equipment grant under the Apple Library of Tomorrow Program.

November 4

■ *Cultural Heritage Observation* To observe American Indian Heritage Month, the Wider Audience Development Program organized "Native Pride, Power, and Politics." The Honorable Elijah Harper (Ojibwa), member of the Canadian Parliament and honorary chief of the Red Sucker Lake Band, discussed sovereignty issues facing indigenous Canadians.

November 4

■ *Museum Shop* The newly expanded and renovated museum shop opened at the National Museum of American Art.

November 6

■ *Television Premiere* "Dream Window: Reflections on the Japanese Garden," produced by the Office of Telecommunications in association with KajimaVision, premiered on PBS.

November 7

■ *International Visitors* Officials of the Department of Antiquities of Jordan visited the Conservation Analytical Laboratory to inspect completed conservation work on part of the plaster sculpture excavated at the site 'Ain Ghazal (7th millennium B.C.). Director General of Antiquities Safwan Khalaf as-Tell signed the proposal for treatment of this material.

November 7

■ *Exhibition* "Alfredo Jaar WORKS," an installation by this Chilean-born artist, opened at the Hirshhorn Museum and Sculpture Garden as the year's project of site-specific art under a grant from the Andy Warhol Foundation for the Visual Arts. Built in a darkened Abram Lerner Balcony Room, the piece, titled "MVSEVM," used five sculptural light boxes to juxtapose a serene museum atmosphere with disturbing images from the Persian Gulf War.

November 13

■ *Permanent Exhibition* A new gallery, "Legend, Memory, and the Great War in the Air," opened at the National Air and Space Museum. In a departure from traditional museum exhibitions on World War I aviation, this gallery contrasts the romantic myth of gallant combat in the sky with the grim reality faced by early military aviators.

November 14

■ *Lecture* A Woodrow Wilson Center session on "Perestroika in Retrospect" featured Egor Ligachev, a former conservative Politburo member and a leading antagonist of Gorbachev on Soviet economic reform, who

addressed the legacy of *perestroika* in the former Soviet Union.

November 14

■ *New Facility* The new National Zoo molecular genetics (DNA "fingerprinting") laboratory opened to investigate the mysteries of complex animal mating strategies and the evolutionary relationships of animals.

November 15

■ *Honor* Arthur E. Raymond, aircraft designer and the "father" of the DC-3 airplane, and John C. Mather and the Cosmic Background Explorer (COBE) Team were each awarded the National Air and Space Museum Trophy.

November 16

■ *Symposium* A symposium was held at the National Portrait Gallery in connection with the exhibition "Ralph Earl: The Face of the Young Republic." A variety of papers were presented by scholars from the Wadsworth Atheneum, Columbia University, the National Portrait Gallery, and the University of Pennsylvania.

November 18

■ *Conference Participation* The Office of Printing and Photographic Services participated in ongoing meetings of subcommittees of the American National Standards Institute. The subcommittees are developing test methods to determine archival permanence in photographic materials.

November 19–21

■ *Conference* The National Forum on Ocean Conservation brought together scientists, policy makers, and members of the general public to frame the critical issues, outline the state of knowledge, and discuss policy options and research needs for ocean conservation. The forum was organized by the Office of Environmental Awareness.

November 21

■ *Species Survival* The National Zoo received a Kiwi bird from New Zealand to continue the breeding at the Zoo of this disappearing species.

November 22

■ *Symposium* A symposium, "Chang Dai-chien and His Art," made possible through the generosity of Mrs. Arthur M. Sackler, was held at the Sackler Gallery in connection with the opening of the first major retrospective in the United States of work by China's foremost modern painter.

November 23

■ *Workshop* Teacher and author Eliot Wigginton, founder of the Foxfire Foundation, taught the first in a series of workshops for teachers participating in the Demonstration Schools Project, an effort of the Office of Elementary and Secondary Education. The project helps teachers and museum staff work together, developing ways that Smithsonian resources can be applied across the curriculum to improve teaching and learning in areas the schools have identified as critical.

November 23

■ *Cultural Diversity* The Office of Public Affairs held the first meeting of the Ad Hoc Latino Media Advisory Committee. The purpose of the nine-member external advisory committee, composed of leading Latino journalists, publishers, and other communicators, is to help OPA examine and improve its methods of communicating with Latino audiences through the media.

November 24

■ *Seminar* The Office of Printing and Photographic Services hosted and cosponsored with the White House News Photographers Association the nation's only free high school seminar in still and video news photography.

Winter

■ *Research* Smithsonian Astrophysical Observatory scientists identified the exploding star Nova Muscae as a binary system in which the primary component is a "black hole."

December

■ *Workshop* The Smithsonian Institution Traveling Exhibition Service, the American Library Association, and corporate sponsor Beneficial Management Corporation hosted a workshop in Washington, D.C., for library exhibitors of the panel adaptation of the National Museum of Natural History's major Columbus Quincenary exhibition, "Seeds of Change."

December

■ **Acquisition** The Frederick Matson collection of Old World clays was transferred from Matson's laboratory at Penn State University to the Conservation Analytical Laboratory. Researchers have analyzed samples of these clays extensively during the past 20 years, making them a valuable addition to the reference materials in the CAL data bank.

December

■ **Publication** *Demography and Natural History of the Common Fruit Bat—on Barro Colorado, Panama* (Smithsonian Contributions to Zoology, no. 511), was published by the National Museum of Natural History. In this 11-year field study, scientists for the first time have been able to capture, mark, and monitor successfully a nocturnal and elusive population of tropical fruit bats, which play an important role in tropical ecosystems.

December

■ **Volunteers** The Visitor Information and Associates' Reception Center's annual appreciation event for volunteer information specialists was held in the Smithsonian Castle Building.

December

■ **Acquisition** Through a generous gift of Irwin Silber and Barbara Dane, the Folkways Archives and Collections, Center for Folklife Programs and Cultural Studies, acquired Paredon Records master tapes and contracts. The collection includes more than 50 titles devoted to political and topical songs.

December

■ **Publication** Beginning with the January–February 1992 issue of *Smithsonian Runner*, the bimonthly newsletter for Native Americans produced by the Office of Public Affairs, contributing members of the National Museum of the American Indian began receiving a special edition of *Runner* that includes a two-page supplement.

December

■ **Research** The Smithsonian Institution Libraries opened a database searching center for CD-ROMs. Funded by a \$50,000 grant from the James Smithson

Society, the center has eight databases, two local workstations, and four ports for dial-in access.

December

■ **Special Events** A festival of performances, symposia, and exhibitions marking the 200th anniversary of Mozart's death was presented by the National Museum of American History and the Woodrow Wilson International Center for Scholars along with the John F. Kennedy Center for the Performing Arts, the Library of Congress, and the National Gallery of Art.

December 2

■ **Renovation** A year-long renovation of the Hirshhorn Museum and Sculpture Garden's 2.7-acre outdoor plaza began, to include a wheelchair entrance, grassy exhibition areas for sculpture, additional trees and plantings, granite paving, and a pathway along the edge. The design was developed in conjunction with museum staff by landscape architect James Urban of Annapolis, Maryland, and is being carried out by the George Hyman Construction Company.

December 5

■ **Cultural Diversity** The Office of Public Affairs, in conjunction with the deputy assistant secretary for the arts and humanities, held two focus groups to determine how African Americans learn about Smithsonian activities and what the most efficient communication channels are for reaching them. The focus groups were a direct outgrowth of the OPA Ad Hoc African American Media Advisory Committee.

December 7

■ **Exhibition** "Time Covers the War: Personalities from World War II" opened at the National Portrait Gallery. Commemorating the 50th anniversary of the Japanese attack on Pearl Harbor, this exhibition included 36 original portraits commissioned for covers of *Time* between 1938 and 1945.

December 7–8

■ **Seminar** To complement the Smithsonian Institution Traveling Exhibition Service exhibition "'Degenerate Art': The Fate of the Avant-Garde in Nazi Germany," the Smithsonian Resident Associate Program, in co-

sponsorship with the United States Holocaust Memorial Museum, presented an all-day seminar with exhibition viewing and screenings of German silent film masterpieces accompanied by live orchestral music.

December 9

■ *Lecture* Françoise Cachin, director of the Musée d'Orsay in Paris and granddaughter of artist Paul Signac, spoke on French Neo-Impressionist artist Georges Seurat in a sold-out lecture sponsored by the Smithsonian Resident Associate Program.

December 15

■ *Special Event* The National Zoo and the Friends of the National Zoo (FONZ) sponsored a special performance of the play Winnie the Pooh for homeless children. Donated gifts were distributed.

December 16

■ *Lecture* An address by Chief Justice William Rehnquist was the highlight of Woodrow Wilson Center activities commemorating the bicentennial of the Bill of Rights.

December 17

Fifty-four portrait images from the collections of Washington Print Club members were displayed in this 13th biennial exhibition, including prints from the 15th to the 20th century.

January

■ *Radio Series Premiere* "Spirits of the Present: The Legacy from Native America," a 13-part series produced by the Office of Telecommunications' Radio Smithsonian, began broadcasting over 410 stations in the United States and Canada.

January

■ *Symposium/Workshop* The Second USA-Philippines Psychology Symposium/Workshop was held in the Philippines. Funded by the National Science Foundation and co-organized by the National Museum of

Natural History, the meeting was attended by more than 100 American and Filipino scientists.

January

■ *Exhibition* The National Museum of African Art opened "Purpose and Perfection: Pottery as a Woman's Art in Central Africa," a new permanent exhibition featuring more than 60 vessels collected between 1900 and 1950.

January

■ *Exhibition Video* "To Achieve These Rights: The Struggle for Equality and Self-Determination in the District of Columbia, 1791-1978" opened at the Anacostia Museum. A video epilogue of the same title was produced by the Office of Telecommunications as the concluding element of the exhibition.

January

■ *Pilot Program* The Smithsonian National Associate Program tested the use of media cosponsorship for its regional lecture series. Five advertisements, two major articles, and three smaller notices appeared in the Tallahassee *Democrat*. Over 70 percent of the more than 1,000 participants ordered their tickets from the advertisements. Similar media cosponsorships are being planned for all future programs.

January

■ *Visitor Services* The National Museum of African Art installed a new FM Assistive Listening System, which allows hard-of-hearing visitors to have access to tours, lectures, films, gallery discussions, and workshops.

January

■ *Exhibition* Five copies of the Smithsonian Institution Traveling Exhibition Service-American Library Association poster panel adaptation of the National Museum of Natural History's major Columbus Quincentenary exhibition, "Seeds of Change," opened simultaneously in public libraries across the United States. The exhibition will visit public libraries in all 50 states through early 1994.

January

■ *Publication* The Smithsonian Institution Traveling Exhibition Service published a brochure and poster

with updated information for "The Long Road Up the Hill: African Americans in Congress," the popular long-running SITES exhibition.

January

■ *Agreement* Ten Japanese paintings from the Freer Gallery of Art collection were sent to Japan for conservation under a pioneering agreement with the Art Research Foundation, a Tokyo establishment that supports international cultural projects, and the government of Japan. The project was initiated in Japan by Professor Ikuo Hirayama, president of the Tokyo National University of Fine Arts and Music and senior director of the Art Research Foundation. Additional paintings will be sent for conservation under a continuing agreement.

January

■ *Publications* The Office of Public Affairs began distribution of its two newest brochures, both funded by the Educational Outreach Program. "Exploring African American Heritage at the Smithsonian" is a four-color, 12-page visitor brochure distributed to junior high and high school students and churches as well as the general public. "African & African American Resources at the Smithsonian" is a 32-page, two-color brochure that gives detailed information on research, collections, employment, and selected activities to scholars, journalists, students, and others.

January

■ *Exhibition* Installation of "Affirmations: Assemblages by Schroeder Cherry" marked the beginning of an effort by the Anacostia Museum to systematically feature the works of regional artists in the museum's Community Gallery.

January

■ *Renovation* The firm of James Stewart Polshek and Partners was hired by Cooper-Hewitt, National Museum of Design to renovate the two townhouses adjacent to the main museum building and develop a plan to integrate the three buildings and the terrace and garden into a unified museum complex. The plan will also enable the museum to comply with the Americans with Disabilities Act.

January–May

■ *Database* The National Museum of African Art's Eliot Elisofon Photographic Archives entered its entire collection of 26,500 field slides by renowned *Life* magazine photographer Eliot Elisofon into a new database that facilitates access to the collection and allows museum staff and archives visitors to conduct research by theme as well as ethnic group.

January 9–10

■ *Public Meeting* Approximately 100 people attended consultation meetings held in Riverside and Sacramento, California, in the continuing effort by the National Museum of the American Indian to solicit participation from Indians and Alaskan Natives in the design, construction, display, and presentation of materials in the new museum.

January 10

■ *Special Event* The Smithsonian Resident Associate Program celebrated the 100th birthday of film great Hal Roach, featuring a dialogue with Roach, film clips, and a festive birthday party enjoyed by a capacity audience.

January 15

■ *Recording Release* *The American Songbook*, the first continuity series from the Smithsonian Collection of Recordings, released *Irving Berlin*, the first album in a six-part series, to be followed by recordings of the works of George Gershwin, Cole Porter, Jerome Kern, Harold Arlen, and Richard Rodgers and Lorenz Hart.

January 15–18

Notes:

The Freer Gallery of Art was closed during this reporting period.

Estimated number of visitors to the National Zoological Park is 3,157,000. (The very nature of the Park, with its indoor and outdoor exhibits and its several pedestrian and vehicular entrances, makes it impossible to obtain exact visitor statistics. To overcome this difficulty, the Zoo has developed a reliable sampling system, which was used to determine this fiscal year 1992 estimate.)

Appendix 3

Academic, Research Training, and Internship Appointments and Research Associates in Fiscal Year 1992

The first section of this Appendix lists recipients of fellowships and other appointments awarded to scholars and advanced students under the auspices of the Office of Fellowships and Grants. Students and museum professionals who held museum internships or participated in special projects administered by the Office of Museum Programs are listed in the second section. The third section contains a listing of Smithsonian Research Associates.

Academic and Research Training Appointments

The Smithsonian offers, through the Office of Fellowships and Grants, research and study appointments to visiting scientists, scholars, and students. The appointees are provided access to the Institution's facilities, staff specialties, and reference resources. The persons—listed by bureau or office—in this Appendix began their residencies between October 1, 1991, and September 30, 1992, and have been in residence for three months or longer. Predoctoral and Postdoctoral Fellows, Visiting Scientists or Scholars, and other awardees and participants in special programs are so listed. Listed for each Fellow or Visitor is the institution where each received, or expects to receive, a degree or the home university or institution; a brief description of the project undertaken at the Smithsonian; the Smithsonian advisor; and dates of residency.

Internships and Other Appointments

The Smithsonian offers internships and other special appointments to undergraduate and graduate students and to museum professionals. The interns included here began their appointments between October 1, 1991, and September 30, 1992. Those who received special awards or participated in special programs are so listed.

Wherever possible the home institution, a brief description of the project undertaken at the Smithsonian, and the dates of service are given.

Office of Public Affairs

Kimberly Davis, Bachelors Degree. Developing and updating media mailing lists; writing a news release for distribution to the print media; assisting with publicity campaigns, September 22, 1992 through December 31, 1992.

Meredith Marsh, Bachelors Candidate. Working closely with public information officer, help to maintain clips, write press releases; working closely with Folklife festival coordinators, June 1, 1992 through August 31, 1992.

Sciences

Conservation Analytical Laboratory

Jennifer Beers, Bachelors Degree. Paper Conservation Laboratory, Learn about examination, treatment, and analysis of parchment and parchment paper, June 22, 1992 through September 30, 1992.

Jan Burandt, Masters Candidate, Buffalo State College. Paper Conservation Laboratory, conservation survey for Smithsonian Institution Archives, National Museum of American Art, and conservation treatment of a Renwick architectural drawing of the Smithsonian building, July 6, 1992 through August 28, 1992.

Patricia Griffin, Masters Candidate, Institute of Fine Arts, New York University. Objects Conservation Laboratory, train in archaeological conservation, both in the field and in the objects conservation laboratory, October 7, 1991 through October 6, 1992.

Thuy Le, High School Student. Thomas Jefferson High School for Science and Technology. Identification and Analysis of Paleolithic Pigments, August 31 1992 through June 18, 1993.

William Lewin, Bachelors Candidate, Old Dominion University. Furniture Conservation Laboratory, conservation and treatment of Japanned clock, June 9, 1992 through August 18, 1992.

Margo McFarland, Masters Candidate, Institute of Fine Arts, New York University. Paper Conservation Laboratory, undertake conservation surveys, including a survey of monotypes at NMAA for condition and composition and drawings at SI Archives by Renwick for examination and treatment, July 6, 1992 through August 28, 1992.

Catherine Nightingale, Bachelors Candidate, Institute of Archaeology, University of London. Objects Conservation Laboratory, conservation treatment of ancient pre-pottery neolithic statue cache made of plaster from 'Ain Ghazal, Jordan, July 13, 1992 through September 18, 1992.

Arati Raghavan, High School Student, Thomas Jefferson High School for Science and Technology. Neolithic Plaster Identification and Technology, August 31, 1992 through June 18, 1993.

Dana Seaman, High School Student, Thomas Jefferson High School for Science and Technology. Research, extraction and amplification of DNA from ancient plant material, June 29, 1992 through June 29, 1993.

Judith Southward, Masters Degree. Objects Conservation Laboratory, conservation treatment of ancient pre-pottery neolithic statuary cache made of plaster from 'Ain Ghazal, Jordan, June 29, 1992 through August 28, 1992.

Nancy Stanfill, Bachelor's Degree, Kansas City Art Institute. Treatment and research on specialty papers and photographs; assistance in courses, workshops and surveys, September 28, 1992 through September 27, 1993.

Puji Yosep Subagiyo, Visiting Professional, National Museum, Indonesia. Textile Conservation, train in textile conservation and research on traditional materials used in Indonesia, October 1, 1991 through May 1, 1992.

National Museum of Natural History

Genevieve Alvarez, High School Graduate. Marine Systems Laboratory, OESE Intern '92: assist with two living ecosystems and study ecosystems; take salinity readings and maintain the systems pH and temp., July 13, 1992 through August 14, 1992.

Rosa Anchondo, Bachelors Candidate, University of Arizona. Department of Anthropology, work with the *Handbook of North American Indian* staff in researching and archiving picture material and photographs, June 22, 1992 through August 14, 1992.

Michelle Anderson, Bachelors Candidate, Western Washington University. Department of Botany, features of seed morphology of Heliconias will be described, characterized and scored and used in a phylogenetic analyses, May 26, 1992 through July 31, 1992.

Jennifer Apple, Bachelors Candidate, University of Puget Sound. Department of Invertebrate Zoology, diversity and distribution of Mangrove Swamp Invertebrates: specimens will be sorted and identified, the distribution will be mapped from field data, and environmental data will be analyzed as part of a study of mangrove ecology, May 26, 1992 through July 31, 1992.

Alexandria Audet, Bachelors Candidate, MacDonald College. Department of Vertebrate Zoology, May 5, 1992 through July 31, 1992.

Eliza Bancroft, Bachelors Degree. Department of Anthropology, assist in the administration of the American Indian Program and development of the North American Hall project, December 2, 1991 through February 2, 1992.

Eric Bannasch, High School Graduate. Department of Anthropology, OESE Intern '92: assist in sorting, processing and cataloging artifacts from North American sites; organize and enter data into computer, July 13, 1992 through August 14, 1992.

Robin Baron, Masters Candidate. ADP, digitizing and geographic data entry for computer mapping and geographic information systems projects, March 2, 1992 through June 30, 1992.

Robin Baron. Department of Botany, the application of geographical information systems to a botanical inventory of the Parque Nacional Sierra Nevada, Venezuela, May 18, 1992 through November 18, 1992.

James Breiler, Masters Candidate, University of Washington. Department of Anthropology, develop study plan for implementation of tribal museums, January 27, 1992 through February 22, 1992.

Nicole Brooks, High School Graduate. Insect Zoo, OESE Intern '92: conduct public feedings, insect handling and presentations; daily preparation of exhibits and care of insect cultures, July 13, 1992 through August 14, 1992.

Jerry Burgess, Masters Candidate, University of Maryland. Department of Mineral Sciences, help to: gather and dis-

- seminate information about current volcanism and earthquakes for the monthly GVN Bulletin; produce Global Volcanism 1986-92, documenting 6 years of Bulletin volcano reporting; build a petrologic and tectonic database linked to the Volcano Reference File, February 24, 1992 through September 4, 1992.
- Judith Buzzi, Visiting Professional. Insect Zoo, develop curricula material for classroom teachers using arthropods to teach basic concepts of ecology, animal behavior, and the scientific method, July 13, 1992 through August 14, 1992.
- Diana Clise, Masters Degree. Conservation Laboratory, participate in on-going volunteer projects, June 1, 1992 through August 7, 1992.
- Tanisha Cobb, High School Student, Frederick Douglas High School. Naturalist Center, participate in workshops as well as assist supervisor and workshop consultants with the implementation of the Natural Science Institute for Teachers of Minority Students, June 29, 1992 through August 7, 1992.
- Juanita Cole, High School Graduate. Naturalist Center, participate in workshops as well as assist supervisor and workshop consultants with the implementation of the Natural Science Institute for Teachers of Minority Students, June 29, 1992 through August 7, 1992.
- Margaret Cuasay, Bachelors Degree. Department of Mineral Sciences, preparation and analysis of volcanic rock samples, December 2, 1991 through September 30, 1992.
- Brian Demedius, Bachelors Candidate, Maryland Institute College of Art. Department of Scientific Illustrations, paleontological illustrations, January 31, 1992 through May 31, 1992.
- Ricky Dickens, High School Graduate. Naturalist Center, participate in workshops as well as assist supervisor and workshop consultants with the implementation of the Natural Science Institute for Teachers of Minority Students, June 29, 1992 through August 7, 1992.
- Amy Downing, Bachelors Candidate, University of Michigan. Department of Vertebrate Zoology, systematic review of the fish genus *Dermogings*, May 26, 1992 through July 31, 1992.
- Nathan Eckrich, Bachelors Candidate, San Diego State University. Department of Botany, herbivore induced morphology of marine algae, May 26, 1992 through July 31, 1992.
- Jennifer Edge, High School Graduate. Department of Anthropology, OESE Intern '92: assist in researching Benedicte Wrensted, a photographer whose work documents the Northern Shoshone and Bannock Indian tribes; search old newspapers to locate information, June 8, 1992 through July 10, 1992.
- David Ellenberger, Bachelors Candidate, Albertson College of Idaho. Department of Vertebrate Zoology, morphometric analysis of cranial development of Least Chipmunks, May 26, 1992 through July 31, 1992.
- Turwayne Foster, High School Student, F.W. Ballou High School. Naturalist Center, participate in workshops as well as assist supervisor and workshop consultants with the implementation of the Natural Science Institute for Teachers of Minority Students, June 29, 1992 through August 7, 1992.
- Tess Freidenburg, Bachelors Candidate, Portland State University. Department of Physical Anthropology, evidence of European contact as reflected in skeletons from Easter Island, January 8, 1992 through March 20, 1992.
- Mary Gaines, Visiting Professional. Department of Anthropology, review trade books on American Indians for cultural and historical accuracy and cultural sensitivity; books found suitable will be included on a bibliography to be distributed to elementary and secondary teachers, July 6, 1992 through August 14, 1992.
- Julia Geoffrey, Bachelors Candidate, New Mexico Highlands University. Department of Anthropology, assist in research on human bones, June 1, 1992 through July 31, 1992.
- Arnetta Girardeau, Masters Candidate, Duke University. Department of Anthropology, study of material and social coding found in the early ethnographic photographs of Cherokee and Seminole Indians, June 22, 1992 through August 31, 1992.
- Jonathan Goldberg, Masters Degree. Department of Mineral Science, assist in gathering and disseminating information about current volcanism and earthquakes for the monthly GVN Bulletin; produce Global Volcanism 1986-1991, documenting 6 years of Bulletin volcano reporting; build a petrologic and tectonic database linked to the Volcano Reference File, July 20, 1992 through September 25, 1992.
- Jonathan Goodrich, Bachelors Degree. Department of Asian Ethnology, Assist P. Taylor with research and organization of Abbott Letters & Taiwanese Hell Scrolls exhibit, April 27, 1992 through July 14, 1992.
- Katherine Gould, Bachelors Degree. Department of Biology, species delimitation in the floral genus *Werneria*, an Andean composite, through character analysis of collected specimens, May 26, 1992 through July 31, 1992.
- Carolyn Gray, Masters Candidate, George Washington University. Will be assisting with the public affairs efforts for the "Seeds of Change" exhibit in the National Museum of Natural History, September 28, 1992 through December 16, 1992.
- Naomi Graychase, Bachelors Candidate, Smith College. Working on the handbook of Native American Indians, September 8, 1992 through December 18, 1992.
- Cheyenne Harris, Bachelors Degree. Department of Anthropology, study of Native American metalwork in the museum, June 1, 1992 through June 12, 1992.
- Michael Henry, Masters Candidate, George Washington University. Handbook of the American Indian, work on women photographers of Native American peoples, January 9, 1992 through May 30, 1992.
- Kerry Inman, Bachelors Degree. Department of Botany, Commelinaceae Research: Is *Antherocopsis sepalosa* a species of *Murdania*, May 25, 1992 through July 31, 1992.

- Kimberly Jackson, Bachelors Candidate, Howard University. Systematics Laboratory, work with curators on identifying, sorting, and analyzing cephalopods, June 1, 1992 through August 7, 1992.
- Regina Jennings, Bachelors Degree. Office of the Director, assist public relations with publicity, media relations, and special events/features; work with curators on "Seeds of Change" exhibit, June 3, 1992 through August 7, 1992.
- Rajeshwari Jhala, Bachelors Degree. ADP, digitizing and geographic data entry for computer mapping and geographic information systems projects, March 2, 1992 through August 31, 1992.
- Kimberly Johnson, Bachelors Candidate, Oberlin College. Department of Education, research labels in Natural History exhibits for gender bias, January 7, 1992 through January 29, 1992.
- Mary Jurkiewicz, Bachelors Degree. Move Office, work on the Plains Indian Project—cleaning and shipping objects, January 6, 1992 through May 31, 1992.
- Pamela Keef, Bachelors Degree. Department of Botany, Medicinal plants of the Philippines—compile data sheets giving information on several hundred medicinal plants of the Philippines, May 26, 1992 through July 31, 1992.
- Tae Kim, Bachelors Candidate, Reed College. Laboratory of Molecular Systematics, evolutionary relationship within the Lythraceae—a comparison of ribosomal DNA sequences, May 25, 1992 through July 31, 1992.
- Deanna Kingston, Masters Candidate, Oregon State University. Will be assisting Steve Loring in going through the Henry Collins collection including photos, artifacts, and films. Will also look at films made by ?? from 1939 and 1964 World's Fair in New York, August 24, 1992 through October 16, 1992.
- Lawrence Lopez, Bachelors Candidate, Agraria University. Laboratory of Molecular Systematics, black capped and Carolina Chickadees are known to hybridize—isolate DNA, amplify specific segments of DNA and sequence homologous segments of DNA to verify genetic introgression at a contact zone; vocalization and morphology patterns will be analyzed, May 26, 1992 through July 31, 1992.
- Consuelo Marino, Bachelors Candidate, University of Colorado. Department of Paleobiology, Ocean Surface Temperature and vertical gradients in mastrichtiam Antarctic Oceans using carbon and oxygen isotopes data from Cretaceous Foraminifera, May 25, 1992 through August 30, 1992.
- Montre McKinney, High School Student, Duke Ellington School. Museum Shops, work with staff to construct, build, and place displays in museum shops around the Institution.
- Malik Menefee, Bachelors Candidate, University of Maryland. Department of Paleobiology, study of phylogenetic relationships and evolution in Physeterids (sperm whales) using a cladistic procedure, May 26, 1992 through July 31, 1992.
- Catherine Miller, Bachelors Candidate, Sweet Briar College. Discovery Room, introduction to the Discovery Room and Discovery Room programs; update Discovery Room exhibit components, January 6, 1992 through January 31, 1992.
- Elizabeth Noznesky, Bachelors Candidate, Georgetown University. Department of Anthropology, identification of an early daguerreotype and aiding the supervisor with a North Pacific Project, January 22, 1992 through May 31, 1992.
- Jennifer Olsen, Bachelors Candidate, Tulane University. Department of Paleobiology, ocean surface temperature and vertical gradients in the mastrichtian Anarctic Ocean using carbon and oxygen isotope data from Cretaceous Foraminifera, May 26, 1992 through July 31, 1992.
- Sarah Orndorff, Bachelors Degree. Organizing a photographic collection documentation the Canela Indians of Northern Brazil for Dr. Bill Cracker, as well as, examining human skeletal remains for Dr Doug Owsley, February 1, 1992 through May 1, 1992.
- Linnette Perez, Bachelors Candidate, University of Puerto Rico. Department of Vertebrate Zoology, Systematic resolution of the taxon *Leptodactylus gracilis delattini*—analyze the new call data to figure out if it is a subspecies or a full species, May 26, 1992 through July 31, 1992.
- John Perrine III, Masters Candidate, Vanderbilt University. Department of Paleobiology, studies of late Paleozoic plants: chemical treatment of fossil samples to determine original localized biodensities, May 26, 1992 through July 31, 1992.
- Cheryl Petrina, Masters Candidate, University of Maryland. Department of Mineral Sciences, help gather and disseminate information about current volcanism and earthquakes for the monthly GVN Bulletin; produce Global Volcanism 1986-1991, documenting 6 years of Bulletin volcano reporting; build a petrologic and tectonic database linked to the Volcano Reference File, February 24, 1992 through June 26, 1992.
- Robin Porter, Bachelors Candidate, Maryland Institute College of Art. Department of Anthropology, learn the principles of illustrating ethnological/archeological artifacts for publication as well as production of visual materials for publication of the "Handbook of North American Indians", January 15, 1992 through May 15, 1992.
- Hilga Prins, Masters Degree. Department of Anthropology, material culture of Indonesia, W.L. Abbott collection, transcription and publication of field correspondence and photos, May 21, 1992 through November 30, 1992.
- Thomas Prinzie, Bachelors Candidate, Slippery Rock University. Department of Biology, isozyme electrophoreins quantification of genetic variation present in a series of populations of a species of the tropical plant genus *Heliconia*, May 26, 1992 through July 31, 1992.
- Jo Ann Reynolds, Bachelors Candidate, Eastern Connecticut State University. Department of Biology, Gesneriaceae of Mesoamerica, *Eucodoria* through study of library, herbarium and fresh material documented relationships and distribution of the genus, verified limits of variation in morphol-

- ogy, produced descriptions and keys using DELTA, and prepared phylogenetic analysis of *Euco donia* and its cognates, May 26, 1992 through July 31, 1992.
- Andrew Roberts, Masters Candidate, George Mason University. Geographic Information Systems, digitize maps and spatial analyses, February 12, 1992 through May 30, 1992.
- Andrew Roberts, Masters Degree. Department of Botany, application of geographical information systems to a botanical inventory of the Parque Nacional Sierra Nevada, Venezuela, May 18, 1992 through July 31, 1992.
- Rebecca Robinson, Bachelors Candidate, Indiana University. Department of Mineral Science, petrographic and mineral chemistry analysis of aplites from Western Maine and their relations to associated pegmatite and granite bodies, May 26, 1992 through July 31, 1992.
- David Rogers, Bachelors Candidate. Department of Botany, medicinal flora of the Philippines: information-gathering from the published literature, including various medicinal and drug-plant uses, common names and chemistry, February 3, 1992 through April 9, 1992.
- Stephen Schellenberg, Bachelors Degree. Department of Paleobiology, morphometric analyses of Late Paleozoic zygo pleurid gastropods, May 26, 1992 through July 31, 1992.
- Lisa Schultheis, Bachelors Degree. Laboratory of Molecular Systematics, study of the evolution of seed plants of the molecular level—concentration on the Gnetales, May 26, 1992 through July 31, 1992.
- Alexia Scott, Masters Candidate, George Mason University. Department of Anthropology, scientific illustration, June 22, 1992 through September 1, 1992.
- Maureen Shea, Bachelors Degree. Department of Anthropology, examine and analyze human skeletal remains from recent forensic cases as well as analyze collections recovered from historic or prehistoric archeological sites, May 26, 1992 through July 31, 1992.
- Jill Sheasley, Bachelors Degree. Department of Botany, possible taxonomic differences in populations of *Lobaria oregana*, May 26, 1992 through July 31, 1992.
- Kevin Shuster, Bachelors Candidate, University of Georgia. Department of Paleontology, scientific illustration, January 14, 1992 through August 14, 1992.
- Stanisic Sinisa, Bachelors Candidate, Belgrade University-Yugoslavia. Global Volcanism Network Project: Studies of Contemporary and recent volcanic activity, September 9, 1992 through December 31, 1992.
- Shelly Skomra, Visiting Professional. Office of Education, serve as teacher mentor with the Teacher Science Institute; work with new students helping them to discover ways museum methodology can be applied to school curriculum, July 6, 1992 through August 14, 1992.
- Mary Strickland, Masters Candidate, Louisiana State University. Department of Anthropology, conservation, storage, and mounting of museum objects, June 15, 1992 through August 15, 1992.
- Gretchen Stromberg, Bachelors Candidate, UC Davis. Documentation of Apache skeletal remains for repatriation evaluation - assistant/apprentice to regular repatriation office staff, September 15, 1992 through December 12, 1992.
- Rosanna Tall Bear, High School Graduate. Museum Support Center, OESE Intern '92: assist museum technicians in preparing Native American collections for transfer to a new facility; clean, inspect, invoice, and pack objects, July 13, 1992 through August 14, 1992.
- Gabrielle Tayac, Masters Candidate, Harvard University. Department of Anthropology, survey ethnographic, archival, and historical materials pertaining to the Piscataway and other eastern Algonkian peoples, June 8, 1992 through August 14, 1992.
- Jen Thangavelu, High School Student, Garrison Forest School. Department of Anthropology, scientific illustration, May 18, 1992 through July 5, 1992.
- Christine Thede, Bachelor's Degree. Department of Conservation, intern will work as a team member on anthropology move project. She will also work on specific conservation treatments related to the move project, August 3, 1992 through August 1, 1993.
- Lucy Thomason, Masters Candidate, University of Texas. Department of Anthropology, endangered Native American languages, May 18, 1992 through August 10, 1992.
- Cristina de la Torre, Bachelors Candidate, University of California, Berkeley. Department of Anthropology, investigate various anthropological opportunities in museums, June 1, 1992 through September 8, 1992.
- Ain Tucker, High School Graduate. Naturalist Center, participate in workshops as well as assist supervisor and workshop consultants with the implementation of the Natural Science Institute for Teachers of Minority Students, June 29, 1992 through August 7, 1992.
- Laura Lee Utz, Bachelors Candidate. Special events marketing plan, donor research, public relation projects, campaign dinner, proposal, September 16, 1992 through December 9, 1992.

Publications of the Staff of the Smithsonian Institution and Its Subsidiaries in Fiscal Year 1992

Office of Public Affairs

- The Torch.** A monthly newspaper for Smithsonian employees, featuring profiles, question-and-answer columns about interesting jobs, previews of upcoming events, classified ads, and more. Circulation is 10,200, which includes staff, volunteers, and a list of interested individuals and organizations outside the Smithsonian. Editor: David Lewis
- Smithsonian Institution Research Reports.** A quarterly newsletter that disseminates information on Smithsonian research to an audience of about 80,000 readers (10,000 scientists, libraries, museums, universities, journalists, and others and 70,000 Contributing Members of the National Associate Program). Editor: Jo Ann Webb
- Smithsonian Runner.** A bimonthly newsletter for Native Americans, featuring informational updates on the National Museum of the American Indian and articles on research and other projects, activities, and events at the Smithsonian that are of particular interest to Native Americans. Circulation is more than 18,000, which includes Native American journalists and community leaders, as well as members of the National Museum of the American Indian. Editor: Dan Agent
- Exploring African American Heritage at the Smithsonian.** A 12-page, four-color visitor brochure for secondary-school students and the general public. Coordinator: Lilas Wiltshire
- African & African American Resources at the Smithsonian.** A 32-page, two-color brochure with detailed information on behind-the-scenes research, collections, and employment opportunities and specific activities for scholars, journalists, students, and others. Coordinator: Kathryn Lindeman
- Smithsonian News Service.** A feature-story service that provides four articles and appropriate artwork each month to more than 1,000 daily and weekly newspapers and other media in the United States and abroad. Syndicated

- "Speakers Corner with Roger Mudd" was a weekly one-hour series co-produced by Radio Smithsonian and the William Benton Broadcast Project and distributed on 181 stations from January through June by WFMT Fine Arts Network. The programs featured scholars and experts from Oxford University, the University of Chicago, and Resident Associates Lecture Programs sharing their insights on the arts and humanities, the sciences, politics, and public affairs. Smithsonian programs included:
- S. Schoenbaum: "Shakespeare through a Magnifying Glass": Renowned author and scholar on the Bard, Professor Schoenbaum takes a look at some of the most recent scholarship in this area.
- Herbert Simon: "Artificial Intelligence": A Nobel Laureate in Economics, pioneer of political science, psychology, and management, and founding father of artificial intelligence, Simon examines the evolution of "thinking machines," and the search for new ideas.
- Susan Faludi: "An Undeclared War Against Women?": This Pulitzer Prize-winning author examines the image and treatment of women in American life over the last decade and the growing backlash against women partly due to the success of the women's movement.
- Norman Mailer: "Harlot's Ghost": Prolific author/colorful personality Mailer reads from his long-awaited novel, a penetrating look at the American scene since the end of WW II.
- Andre Previn: "No Minor Chords": Academy-Award winning composer, arranger, and conductor of some of the world's leading orchestras, Previn recalls his years in Hollywood in the 40s, 50s, and 60s.
- Abraham Pais: "Physics, Philosophy, and Politics: The Life and Times of Niels Bohr": Bohr was a giant among 20th-century scientists, a Nobel Prize winning physicist in 1922 who participated in experiments leading to the atomic bomb, but he was also one of the first scientists to recognize the dangers of atomic weapons and organize peaceful uses for atomic energy. Abraham Pais, a physics professor, examines both sides of Bohr's personality.
- Martin Gilbert: "Statesman Extraordinaire: The Life of Sir Winston Churchill": Churchill's biographer addresses the British PM's strong familial and political ties to America.
- Lester Brown: "Saving the Planet": Founder of the Worldwatch Institute, which seeks to educate the public about wasting non-renewable resources and pollution of the Earth, outlines plans for reversing environmental degradation and turning economic growth into environmentally sustainable progress.
- Flora David: "The History of the Women's Movement in America Since 1960": Professor/author David presents an overview of the women's movement from the '60s to the '90s, examining the forces, personalities, victories, and failures of the crusade that has changed our lives.
- "Jazz," a Radio Smithsonian special broadcast during February to commemorate Black History Month, featured jazz enthusiast Julian Bond as host and drew upon performances by the Smithsonian Jazz Orchestra for its music.
- "Indian Airobics," a "Spirits of the Present" special - A variety program of humor, music, and story telling, hosted by actress Elaine Miles and produced by Radio Smithsonian and the Native American Public Broadcast Consortium, brought American Indian performers together for a two-hour program aired on American Public Radio in the fall of 1992.
- "Sovereign to Sovereign," a "Spirits of the Present" special—A discussion program produced by Radio Smithsonian and the NAPBC, posing the question of what might have happened had the European and American governments parlayed with the Indian tribes as full sovereign nations; aired on American Public Radio in the fall of 1992.

Donors to the Smithsonian Institution in Fiscal Year 1992

The Board of Regents and the Secretary of the Smithsonian join with the entire staff in thanking all of the Institution's friends for the generosity they have shown with their financial support, gifts to the collection, and in-kind donations. Gifts are recorded under the title of the recipient bureau or office, with a brief description of the gift where appropriate. If perchance the name of any donor has been omitted from these lists, it is an inadvertence and in no way diminishes the Institution's gratitude. Many gifts were received from donors who prefer to remain anonymous; the Smithsonian wishes to thank these people, as well, for their support.

Contributing Members of the Smithsonian Institution in Fiscal Year 1992

The Contributing Membership of the Smithsonian National Associate Program supports the Institution through generous annual donations and special gifts. Members' participation enables the Smithsonian to pursue specific projects and broader research, acquisition, preservation, and education efforts than might otherwise be possible.

The Smithsonian Institution therefore gratefully acknowledges the loyal and thoughtful assistance of the Contributing Members, including the Sustaining Members (\$600 annual contribution) and Sponsoring Members (\$300 contribution).

Financial Report

Nancy D. Suttentfield, Chief Financial Officer

Introduction

The Smithsonian Institution receives funding from both federal appropriations and nonappropriated trust funds. Federal appropriations are the primary source of operating funds to address the Institution's fundamental responsibilities in caring for and conserving the national collections, sustaining basic research on the collections and in selected areas of traditional and unique strength, and educating the public through exhibitions and other outreach programs about the collections and research findings. Administrative and support functions are also supported partially by federal appropriations. Federal appropriations account for 71 percent of the Institution's net operating funds. In addition, capital outlays for building repair and restoration and for most new construction are also supported primarily through federal appropriations, although certain construction projects, e.g., the National Museum of the American Indian and a planned West Court complex at the National Museum of Natural History, rely heavily on private fund-raising or other trust fund resources.

Trust funds account for the remaining 29 percent of the Institution's net operating funds. The Smithsonian defines trust funds as all funds it receives from sources other than direct federal appropriations. These sources include gifts and grants from individuals, corporations, and foundations; earnings from short- and long-term investments; earnings from membership programs; and gross receipts from auxiliary activities such as *Smithsonian* magazine, museum shops, food service concessions, and mail order activities. The Smithsonian receives grants and contracts, primarily from other federal agencies, but also from state governments, which are considered trust funds.

Smithsonian trust funds, depending on their source, purpose, and applicable restrictions, are used for operations, construction, and endowment. These nonappropriated trust funds are used to cover the expenses of income-producing auxiliary activities, supplement federal appropriations for programs, and cover an appropriate proportionate share of the Institution's administrative expenses. The use of Smithsonian trust funds is further classified as restricted or unrestricted. Re-

stricted funds are those on which the donor or funding agent places limitations. Seventy percent of the trust net operating funds are restricted. Approximately 54 percent of the endowment is restricted as well.

The following sections describe the Institution's general financial situation and its planned responses to changing conditions; specific financial outcomes for fiscal 1992; measures, both organizational and financial, to assure the future fiscal health of the Institution; and relationships with other affiliated organizations.

Financial Situation and Prospects

During fiscal 1992, an analysis of federal appropriations to the Institution for the past several years was conducted. That analysis revealed that a major portion of each annual increment had gone not to support general operating expenses, but to support specific and/or earmarked purposes, such as the new National Museum of the American Indian, major scientific instrumentation for the Smithsonian Astrophysical Observatory, new global change research programs, subsidized participation fees for traveling exhibitions, and special commemorative events such as the Columbus Quincentenary. Despite the apparent increases in appropriation support, many factors, including the need to apply increases to specific activities, had the effect of eroding the purchasing power of the Institution's operating budget. Other such factors include shortfalls in appropriations relative to additional new costs, including mandated pay adjustments, employee benefits, new regulatory requirements, and inflation.

Although the Institution's federal appropriation for operating expenses was \$97.3 million greater than in fiscal 1987, the fiscal 1992 funding level (in 1987 dollars) represented a decrease of \$22.4 million actually available for the core programs that were in place in fiscal 1987. This loss of purchasing power resulted in the inability to fill many positions that perform essential functions, such as collections care and facilities maintenance and repair; the deferral of the replacement of scientific equipment; the postponement of the purchase of library books and serials; and the reduction of other basic program support.

At the same time, the weakened national economy, along with a decrease in the number of visitors, has led to decreased revenues from the Smithsonian's various income producing activities. Unrestricted trust fund income from these activities dropped to pre-fiscal 1987 levels. In response, the Institution reduced its budget allocations to fellowships, collections acquisition, scholarly studies, educational outreach, and special exhibitions to 28 percent below the fiscal 1987 level of \$6.4 million.

Prospects for catch-up funding from both appropriated and nonappropriated sources are dim. Therefore, in planning for fiscal 1993, the Institution conducted a comprehensive examination of each of its programs and activities, considering centrality to the Smithsonian's mission, quality, and cost-effectiveness. As a result of that examination, it has begun a multi-year restructuring program to restore and maintain financial equilibrium.

Fiscal 1992 Results

Fiscal 1992 Sources of Operating Funds
(Source: Tables 1 and 2)

<i>Source of Funds</i>	<i>Gross Sources (\$000s)</i>	<i>Net Sources (\$000s)</i>	<i>Net Sources (%)</i>
Federal Appropriation	283,076	283,076	71
Government Grants and Contracts	42,689	42,689	11
Other Trust Resources	248,917	75,551	18
Total Available for Operations	574,682	401,316	100

The fiscal 1992 federal appropriation of \$281.2 million, plus an additional \$1.9 million for the Special Foreign Currency, U.S. India, and the Canal Zone funds, provided the funding nucleus for ongoing programs of the Institution and limited support for the new National Museum of the American Indian and for other areas of cultural pluralism, environmental, and education initiatives. Modest increments of funding were directed to the reinstallation of outdated exhibitions, the upgrading and replacement of essential information systems, and strengthening internal controls.

The Smithsonian concluded fiscal 1992 with a shortfall of \$3.813 million in unrestricted general trust funds. The shortfall derived from continued increases in expenditures while revenues from auxiliary activities remained essentially flat in comparison to fiscal 1991. Although management had already initiated reductions in baseline expenditures, it became evident that additional cuts were required in fiscal 1993 to bring costs within further reduced levels of unrestricted trust income.

In fiscal 1992, government agencies sponsored research projects totalling \$42.7 million at the Smithsonian, an increase of \$5.9 million, or 16 percent over fiscal 1991. Of this increase, \$4.4 million represents funding from the National Aeronautics and Space Administration (NASA) to support research at the Smithsonian Astrophysical Observatory.

Other nonappropriated income from gifts, non-government grants, endowments, current investments, and revenue-producing activities totaling \$75.55 million augmented funds from federal sources. The Smithsonian is especially grateful to its many friends in the private sector whose generosity contributed vitally to its work. Donors are listed in the Benefactors section of this annual report.

Construction and Plant Funds (Table 8)

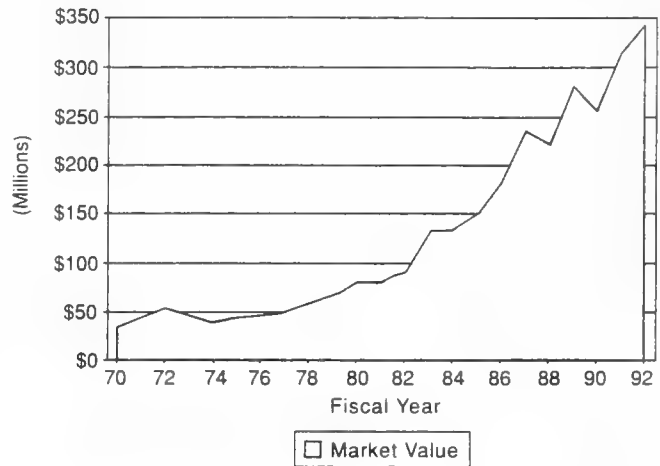

In fiscal 1992, the Smithsonian received \$23.599 million in direct appropriations for replacement of major building systems at the National Museum of Natural History and the National Museum of American History, as well as for repair, restoration, and code compliance projects throughout the Institution.

Appropriations for major construction included \$9.874 million for reconfiguration of the National Museum of Natural History's East Court; \$2.37 million for the planned National Museum of the American Indian; and \$1.678 million for the initial design for the General Post Office Building. The National Zoological Park received \$7.899 million for repairs and other projects in its master plan, including the Hall of Humankind and Amazonia. Appropriations for other con-

struction activities included \$5.234 million for minor construction and planning for future capital projects.

Endowment (Tables 5, 6, and 7)

The Institution has a large number of endowment and quasi-endowment funds. For investment purposes, these funds are pooled into a consolidated portfolio, and the investment policy is focused on the total return (i.e., dividends, interest, and realized and unrealized capital gains) on the portfolio. Each year, the market value of the portfolio increases by new gifts, net transfers, and the total return on the portfolio. It is reduced by the annual payout for current expenditures, fees, and expenses. Each fund within the consolidated endowment purchases shares similar to an investor in a mutual fund. The value of each share increases as the market value of the consolidated portfolio (net of new gifts and transfers) increases and, annually, it receives the applicable payout per share for current expenditures.

The Investment Policy Committee of the Smithsonian's Board of Regents oversees the development of the investment policy and the annual payout for the consolidated endowment. The overall objective of the endowment is to maintain its real purchasing power (net of new gifts and transfers). Current policy calls for an average payout of 4.5 percent of the average market value over the prior 5 years. To achieve the endowment objectives, the investment policy targets a real return of 5 percent.

During fiscal 1992, the market value of the consolidated endowment increased to \$343.6 million, a \$29.8 million gain. Following past practice to increase the endowment for the future, \$3.1 million in revenue generated from auxiliary enterprises was transferred to the unrestricted endowment. The total return was 10.3 percent, the payout was 4.2 percent of the five-year average market value, and fees were 0.4 percent of average market value of the portfolio. With inflation running at an annual rate of 2.4 percent, the real purchasing power of the endowment increased by 3.8 percent. At fiscal year-end, the portfolio of the Institution reflected 36 percent in bonds, 7 percent in cash and cash equivalents, and 57 percent in equities.

Financial Management

In 1990, to assure effective financial management, the Smithsonian established the position of assistant secretary for finance and administration and later designated that position as chief financial officer of the Institution. The chief financial officer has responsibilities for safeguarding all of the Institution's assets and oversees all financial offices to assure integrated financial planning and proper coordination of all financial management functions.

Although not required to comply with the Federal Chief Financial Officers Act of 1990, the Smithsonian has elected to comply voluntarily with the spirit and intent of its objectives for sound financial management and internal controls. The Smithsonian is, in fact, well ahead of most federal agencies in implementing the principal requirements of the act. In addition, the Institution's finance offices are taking part in an effort to continuously improve the quality of their products and services and the cost-effectiveness of their business processes through total quality management (TQM). A program to train all financial staff is under way and implementation of the program is proceeding.

Specific financial management improvement initiatives undertaken or completed in fiscal 1992 include

- an external review, arranged by the Private Sector Council, of the management and organization of Smithsonian finance and administration by executives from the Eastman Kodak Company, the Gillette Company, the Lockheed Corporation, and the American Express Company;
- the development of a new accounts payable/purchase order system—to be completed by the end of fiscal 1993;
- the development of a more highly coordinated fund-raising program plan;
- collateralization of Smithsonian funds on deposit with major banks through the Federal Reserve Bank;
- the establishment of a Smithsonian-wide disaster preparedness plan, the acquisition of a fully equipped disaster response trailer, and completion or initiation of disaster preparedness plans at 22 separate Smithsonian facilities;
- initiation of a study to examine the planning and construction of exhibitions and recommend opportunities for cost savings—to be completed in fiscal 1993.

The Institution's financial statements are audited annually by an independent public accounting firm. Along with the audit report, management also receives a report from the auditors with suggested operational improvements, which management acts upon as appropriate. Coopers & Lybrand's unqualified report for fiscal 1992 is reprinted on the following pages. The Smithsonian's internal audit staff, part of the Office of the Inspector General, assists the outside auditors and regularly audits the Institution's various programs, activities, and internal control systems. The Defense Contract Audit Agency audits grants and contracts received from federal agencies, including the allowability and allocability of indirect cost charges.

The Audit and Review Committee of the Board of Regents met three times during the fiscal year pursuant to its fiduciary responsibilities and the bylaws of the Board of Regents. The committee reviewed the results of the 1991 audit of financial statements and the 1992 audit plan, received reports from the inspector general, and conducted inquiries on a variety of topics directed at safeguarding the Institution's various assets.

Related Organizations

The National Gallery of Art, the John F. Kennedy Center for the Performing Arts, and the Woodrow Wilson International Center for Scholars were established by Congress within the Institution. Each organization is administered by its own board of trustees and reports independently on its financial status. The Smithsonian provides the Wilson Center with certain fiscal, administrative, and support services, as well as office space, on a reimbursement basis.

Administrative services are provided by the Institution on a contract basis for Reading is Fundamental, Inc. The Friends of the National Zoo (FONZ), an independent nonprofit organization, operates under a concessions contract; proceeds accrue to the Zoo.

Report of Independent Accountants
To The Board of Regents
Smithsonian Institution

We have audited the accompanying statement of financial condition of the Smithsonian Institution as of September 30, 1992, and the related statements of financial activity and cash flows for the year then ended. We previously audited and reported upon the financial statements of the Smithsonian Institution for the year ended September 30, 1991, totals of which are included in the accompanying financial statements for comparative purposes only. These financial statements are the responsibility of the Institution's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Smithsonian Institution as of September 30, 1992, and the results of its operations and its cash flows for the year then ended, in conformity with generally accepted accounting principles.

Smithsonian Institution Notes to Financial Statements

1. Summary of Significant Accounting Policies

Basis of Presentation

These financial statements do not include the accounts of the National Gallery of Art, the John F. Kennedy Center for the Performing Arts or the Woodrow Wilson International Center for Scholars, which were established by Congress within the Smithsonian Institution (the Institution) but are administered under separate boards of trustees.

The financial statements of the Institution with respect to Federal Appropriations have been prepared on the obligation basis of accounting, which is in accordance with accounting principles prescribed by the Comptroller General of the United States as set forth in the *Policy and Procedures Manual for Guidance of Federal Agencies*. The obligation basis of accounting differs in some respects from generally accepted accounting principles. Under this method of accounting, approximately \$43,903,000 of commitments of the operating fund, such as purchase orders and contracts, have been recognized as expenditures, and the related obligations have been reported on the Statement of Financial Condition at September 30, 1992 even though the goods and services have not been received. Approximately \$11,964,000 of these commitments are for grants under the foreign currency program. Approximately \$11,088,000 of these commitments are for internal storage facilities and equipment at the Museum Support Center. In addition, construction fund commitments for other projects amounted to approximately \$24,810,000 at September 30, 1992.

The trust funds reflect the receipt and expenditure of funds obtained from private sources, government grants and contracts, investment income and certain business activities related to the operations of the Institution.

Fund Accounting

To ensure observance of the limitations and restrictions placed on the use of resources available to the Institution, accounts are maintained in accordance with the principles of fund accounting. This procedure classifies resources for control, accounting and reporting purposes into distinct funds established according to their appropriation, nature and purposes. Separate accounts are maintained for each fund; however, in the accompanying financial statements, funds that have similar characteristics have been combined into fund groups. Accordingly, all financial transactions have been recorded and reported by fund group.

The assets, liabilities and fund balances of the Institution are self-balancing as follows:

Federal operating funds represent the portion of appropriated funds available for support of Institution operations. Separate subfund groups are maintained for each appropriation as follows: Salaries and Expense, Special Foreign Currency, Barro Colorado Island Trust Fund.

Federal construction funds represent the portion of appropriated funds available for building and facility construction, restoration, renovation and repair. Separate subfund groups are maintained for each appropriation—Construction and Improvements, National Zoological Park, Repairs and Restoration of Buildings, Museum Support Center and the Center for African, Near Eastern and Asian Cultures (Quadrangle).

Federal capital funds represent the value of those assets of the Institution acquired with federal funds and nonexpendable property transfers from government agencies.

Trust current funds, which include unrestricted and restricted resources, represent the portion of non-appropriated funds available for support of Institution operations. Separate subfund groups of current unrestricted funds have been reflected in the financial statements for auxiliary activities (representing primarily the revenue and expenditures of the Smithsonian Associate Programs, including *Smithsonian* magazine and *Air & Space/Smithsonian* magazine, museum shop and mail order sales) and for special purposes (representing internally segregated funds for certain designated purposes). Amounts restricted by the donor for specific purposes are segregated from other current funds.

Trust endowments and similar funds include funds that are subject to restrictions of gift instruments requiring in perpetuity that the principal be invested and that only income be utilized. Also classified as endowment and similar funds are gifts which allow the expenditure of principal only under certain specified conditions. Quasi-endowment funds are funds established by the governing board for the same purposes as endowment funds; however, any portion of such funds may be expended with board approval. Restricted quasi-endowment funds represent gifts for restricted purposes where there is no stipulation that the principal be maintained in perpetuity or for a period of time, but the governing board has elected to invest the principal and expend only the income for the purpose stipulated by the donor.

Trust plant funds represent resources restricted for future plant acquisitions and funds expended for plant.

Interfund Balances

Interfund balances result from short-term advances/borrowings between Institution funds and are repaid, without interest, on a continual basis.

Investments

All investment income, except that of endowment and similar funds, and gains and losses arising from the sale of investments and property, are accounted for in the fund in which the related assets are recorded. Income of endowment and similar funds is accounted for in the fund to which it is restricted or, if unrestricted, as revenue in unrestricted current funds. Gains and losses on the sale of investments are recognized on the trade date basis using the average cost method.

Inventory

Inventories are carried at the lower of cost or market. Cost is determined using the first-in, first-out (FIFO) method, standard cost method or retail cost method (for those inventories held for resale).

Deferred Revenue and Expense

Revenue from subscriptions to *Smithsonian* magazine and *Air & Space/Smithsonian* magazine is recorded as income over the period of the related subscription, which is generally one year. Costs related to obtaining subscriptions to *Smithsonian* magazine and *Air & Space/Smithsonian* magazine are charged against income over the period of the subscription.

The Institution recognizes revenue and charges expenses of other auxiliary activities during the period in which the activity is conducted.

Works of Art, Living or Other Specimens

The Institution acquires its collections, which include works of art, library books, photographic archives, objects and specimens, through purchase by federal or private funds or by donation. In accordance with policies generally followed by museums, no value is assigned to the collections on the statement of financial condition. Purchases for the collections are expensed currently. Proceeds from deaccessions are designated for future collection acquisitions.

Property and Equipment—Federal Funds

Property and equipment purchased with federal funds are recorded in the capital funds at cost and depreciated on a straight-line basis over their useful lives as follows:

Buildings	30 years
Major renovations	15 years
Nonexpendable equipment	10 years

Certain lands occupied by the Institution's buildings were appropriated and reserved by Congress for the Institution and are not reflected in the accompanying financial statements. Property and nonexpendable equipment acquired through transfer from government agencies are capitalized at the transfer price or at estimated amounts, taking into consideration usefulness, condition and market value.

Property and Equipment—Trust Funds

Property and equipment purchased with trust funds for use by nonincome-producing activities are recorded at cost, or appraised value at date of gift, except for gifts of certain islands in the Chesapeake Bay and the Carnegie Mansion, which have been recorded at nominal values. Property and equipment are treated as a deduction of the current fund and as a capitalized cost of the plant fund.

Property and equipment for use by nonincome-producing activities is depreciated on the straight-line basis over their useful lives as follows:

Buildings	30 years
Major renovations	15 years
Equipment	10 years

Depreciation is recorded in the plant fund as a deduction to the investment in plant.

Capital improvements and equipment purchased with trust funds and utilized in income-producing activities are capitalized at cost in the current fund and are depreciated on a straight-line basis over their estimated useful lives of 3 to 10 years.

Government Grants and Contracts

The Institution has a number of grants and contracts with the U.S. Government, which primarily provide for cost reimbursement to the Institution. Governmental grant and contract revenue is recognized within trust funds as expenditures are incurred.

Pledges

The Institution generally records pledges based upon letters signed by donors. Pledges are recorded at net realizable value as a receivable and as deferred revenue on the statement of financial condition. Revenue from pledges is recognized in the year the pledged funds are collected.

Gifts, Bequests and Other Grants

The Institution recognizes revenue from gifts, bequests and other grants in the year the cash is received.

Contributed Services

A substantial number of unpaid volunteers have made significant contributions of their time in the furtherance of the Institution's programs. This contributed time is not reflected in these statements since no objective basis is available to determine the value of these services.

Annual Leave

The Institution's civil service employees earn annual leave in accordance with federal laws and regulations. However, only the cost of leave taken as salaries is funded and recorded as an expense. The cost of unused annual leave at year-end is reflected in the accompanying financial statements as an asset and an accrued liability in the federal funds.

Annual leave for trust employees is accrued as a liability and expensed in the trust fund, as earned.

2. Related Activities

The Institution provides certain fiscal and administrative services to several separately incorporated organizations in which certain officials of the Institution serve on the governing boards. The amounts paid to the Institution by

these organizations for the aforementioned services, together with rent for Institution facilities occupied, totaled \$265,000 (\$190,000 for the trust funds and \$75,000 for the federal funds) for the year ended September 30, 1992. Deposits held in custody for these organizations were \$5,839,000 as of September 30, 1992.

3. Investments

Investments are recorded at cost on a trade date basis, if purchased, or estimated fair market value at date of acquisition, if acquired by gift. At September 30, 1992, investments were composed of the following:

	Carrying value (\$000s)	Market value (\$000s)
Current funds:		
Short-term investments	\$ 62,502	\$ 63,102
Endowment and similar funds:		
Pooled investments:		
Short-term	48,724	51,292
U.S. Government and quasi-government obligations	70,587	73,360
Corporate bonds and other obligations	53,309	56,882
Common and preferred stock	124,365	166,954
Subtotal pooled investments	296,985	348,488
Non-pooled investments:		
Deposit with U.S. Treasury	1,036	1,072
Charitable trusts	595	834
Subtotal non-pooled investments	1,631	1,906
	298,616	350,394
Plant funds:		
Common stock	125	215
U.S. Government securities	15,990	16,110
	16,115	16,325
Total investments	\$377,233	\$429,821

The deposit with the U.S. Treasury is invested in U.S. Government securities at a variable yield based on market interest rates.

Substantially all the investments of the endowment and similar funds are pooled on a market value basis (consolidated fund) with each individual fund subscribing to or disposing of units on the basis of the per unit market value at the beginning of the month within which the transaction takes place. Of the total units, each having a market value of \$410.20, 323,919 units were owned by endowment funds, and 525,629 units were owned by quasi-endowment funds at September 30, 1992.

The following tabulation summarizes changes in relationships between cost and market values of the pooled investments at September 30, 1992.

	(\$000s)			Market value per unit
	Market	Cost	Net change	
End of year	\$348,488	\$296,985	\$51,503	\$410.20
Beginning of year	312,261	263,884	48,377	378.07
Increase in unrealized net gain for the year			3,126	—
Realized net gain for the year			17,790	—
Total net gains for the year			\$20,916	\$ 32.13

4. Endowment and Similar Funds

The Institution utilizes the "total return" approach to investment management of endowment funds and quasi-endowment funds. Under this approach, an amount equal to the difference between actual interest and dividends earned during the year and the amount computed under the total return formula is transferred to or from the current funds.

In applying this approach, it is the Institution's policy to provide, as being available for current expenditures, an amount taking into consideration such

factors as, but not limited to: (1) 4 1/2% of the five-year average of the market value of each fund (adjusted for gifts and transfers during this period), (2) current dividend and interest yield, (3) support needs for bureaus and scientists, and (4) inflationary factors as measured by the Consumer Price Index. However, where the market value of the assets of any endowment fund is less than 110% of the historic dollar value (value of gifts at date of donation), the amount provided is limited to only interest and dividends received.

The total return factor for 1992 was \$12.50 per unit, equivalent to 4% of the five-year average of the Market Value of each participating fund. The total return amount exceeded actual dividends and interest earned for the year and this excess was transferred from the endowment funds to the current funds (see Note 12).

The endowment fund balance is comprised of the following at September 30, 1992:

	(\$000s)
Endowment—unrestricted	\$ 7,793
Endowment—restricted	100,408
Quasi-endowment—unrestricted	127,526
Quasi-endowment—restricted	56,347
	<u>\$292,074</u>

5. Receivables

Receivables at September 30, 1992 included the following:

	(\$000s)		
	Trust funds	Federal funds	Totals, all funds
Auxiliary activities and other accounts receivable, net of \$5,854 allowance for doubtful accounts	\$18,626	\$ —	\$18,626
Receivables for investment securities sold	7,541	—	7,541
Pledges receivable	3,693	—	3,693
Reimbursements due from grants and contracts	3,550	—	3,550
Interest and dividends receivable	3,604	—	3,604
Interfund receivables	11,617	—	11,617
Accrued annual leave	—	11,483	11,483
Other	19	460	479
	<u>\$48,650</u>	<u>\$11,943</u>	<u>\$60,593</u>

6. Advance Payments

Advance payments represent prepayments made to government agencies, educational institutions, firms and individuals for services to be rendered, or property or materials to be furnished.

As of September 30, 1992, the most significant advances outstanding were: \$6,753,000 to the General Services Administration, principally for construction services including the Museum Support Center and other projects to be completed in future fiscal years; and approximately \$1,608,000, principally under the Special Foreign Currency Program.

7. Property and Equipment

At September 30, 1992, property and equipment were comprised of the following:

	(\$000s)	(\$000s)
Trust		
Current funds		
Capital improvements	\$ 24,143	
Equipment	11,148	
Building	3,981	
Leasehold improvements	1,170	
	40,442	
Less: accumulated depreciation and amortization	(17,547)	
	<u>22,895</u>	

<i>Plant funds</i>	
Land and buildings	67,083
Equipment	8,070
	<u>75,153</u>
Less: accumulated depreciation	(20,778)
	<u>54,375</u>
Total, trust funds	<u>\$ 77,270</u>
<i>Federal</i>	
<i>Capital funds</i>	
Property	\$ 513,916
Equipment	45,743
	<u>559,659</u>
Less: accumulated depreciation	(248,106)
Total, federal funds	<u>311,553</u>
Total, all funds	<u>\$388,823</u>

Included in the accumulated depreciation of the federal capital funds is \$25,830,000 of depreciation expense for 1992.

Depreciation and amortization expense in the trust funds for fiscal year 1992 for income-producing assets amounted to \$2,399,000 and is included in auxiliary activities expenditures in the current funds. Depreciation of non-income-producing equipment and buildings for 1992 amounted to \$2,629,000 and is included in the plant fund.

The balance of the plant fund at September 30, 1992 included \$8,680,000 of unexpended funds for future plant acquisitions.

8. Commitments and Contingencies

Leases for various Smithsonian warehouse and office spaces provide for escalation of rents to coincide with increases in property taxes, operating expenses attributable to the leased property and the Consumer Price Index.

The Institution's operating leases require future minimum lease payments as follows:

<u>Lease payments</u>	<u>(\$000s)</u>
1993	\$ 9,513
1994	7,598
1995	5,343
1996	1,724
1997	1,108
Thereafter	2,877
	<u>\$28,163</u>

Rental expense for office facilities aggregated approximately \$10,407,000 in 1992.

The Institution receives funding or reimbursement from governmental agencies for various activities, which are subject to audit. Audits of sponsored program costs have been completed through the fiscal year ending September 30, 1989, however, final resolution from the cognizant agency for audits of fiscal years 1983 through 1989 has not occurred. Any adjustments which may result from those audits and the audits for fiscal years 1990 through 1992 are not expected to have a material effect on the Institution's financial statements.

9. Long-term Debt

Long-term debt as of September 30, 1992 consists of the following:

	<u>(\$000s)</u>
9% note payable to The Riggs National Bank, interest only payable quarterly commencing December 31, 1986; interest and principal payable quarterly commencing September 30, 1991, until June 30, 1998, with the remaining unpaid principal balance due June 30, 1998.	\$ 9,503
Note payable to Signet Bank, bearing interest at 1% in excess of the Federal Funds Rate, which was 5.5% at September 30, 1992; interest and principal payable in quarterly installments of \$63,000 until December 31, 1996, with the remaining unpaid principal balance due December 31, 1996.	<u>3,610</u>
	<u>\$13,113</u>

The aggregate amount due for all borrowings for the years ending September 30, are as follows: \$1,577,000 in 1993; \$1,700,000 in 1994; \$1,835,000 in 1995; \$1,982,000 in 1996; \$2,143,000 in 1997 and \$3,876,000 in years thereafter.

The proceeds of the note with The Riggs National Bank were used to fund construction of a restaurant addition to the National Air and Space Museum. The proceeds of the note with Signet Bank were used to finance a warehouse facility for Institution museum shops. During the fiscal year ended September 30, 1992, approximately \$1,085,000 was recorded as interest expense and was paid by Auxiliary Activities funds.

10. Federal Operating Funds

The federal operating funds include appropriations for salaries and expenses which are expended in the year received. Also included are amounts approximating \$25,475,000 received with the provision that such amounts can be expended over a period greater than one year.

On November 5, 1990, the U.S. Congress enacted Public Law 101-510, the Defense Authorization Act (Act), which prescribes the rules for determining the availability of appropriation balances and establishes the procedures for closing appropriation accounts.

The major purpose of the Act is to restructure annual appropriation accounts. Beginning with the fiscal year 1989 appropriation accounts, agencies are now required to maintain annual appropriations for a five-year period following the year of appropriation. At the end of an appropriation's five-year life, the appropriation account is closed and any unobligated balances are then returned to the U.S. Treasury. The Act also provides for the phasing out of unexpended previous year's appropriations as of September 30, 1993.

Under the Act, unobligated balances of annual appropriation accounts will remain on the Institution's records until the appropriation accounts are closed.

The federal operating funds for the year ended September 30, 1992 included the following:

	<u>(\$000s)</u>		<u>Fund balance at September 30, 1992</u>
	<u>Revenues and Appropriations</u>	<u>other additions Other</u>	
Salaries and expenses	\$281,183	\$ —	\$15,274
Special Foreign Currency Program	—	—	273
U.S. India Fund (transfers from Department of State)	—	1,319	361
Smithsonian Tropical Research Institute	—	154	69
	<u>\$281,183</u>	<u>\$1,473</u>	<u>\$15,977</u>

On July 11, 1990, a settlement was awarded in the amount of \$3,022,350 arising out of a suit against the United States by a contractor who was defaulted by the General Services Administration for failure to complete a project for the Museum Support Center in a timely fashion. This mandatory obligation falls outside the provisions of the Antideficiency Act. According to accounting principles prescribed by the Comptroller General of the United States, the Institution recognized this expense, in fiscal year 1990, when settlement by the United States resulted in an operating fund deficit. The Institution received appropriations in fiscal year 1992 of approximately \$994,000 as a partial payment of the claim. The Institution will request appropriated funds in fiscal years 1993 and 1994 to pay the balance of the claim.

The Institution has recorded an unrealized loss of \$54,000 to reflect exchange rate changes related to the U.S. India Fund.

11. Collections

In accordance with policies generally followed by museums, collections purchased and donated are not included in the statement of financial condition. The Institution records the acquisition of collections as an expense in the year of purchase and records the deaccession of collections as restricted revenue in the year of sale. For fiscal year 1992, \$8,340,000 was expended to trust funds

and \$1,587,000 to federal funds for the acquisition of collections, and proceeds from deaccessions in trust funds were \$635,000. There were no deaccessions of collections purchased with federal funds in fiscal year 1992.

12. Transfers Among Trust Funds

The following transfers increased (decreased) respective fund balances for the year ended September 30, 1992:

	(\$000s)			
	Current funds		Endowment and similar funds	Plant funds
	Unrestricted	Restricted		
Total return income from endowment	\$ 232	\$ 277	\$ (509)	\$ —
Income reallocated for special purposes	(44)	44	—	—
Endowment reallocated to restricted and unrestricted funds	462	4,260	(4,722)	—
Designated as quasi-endowment	(4,152)	(8,477)	12,629	—
Other	196	(1,115)	176	743
Total transfers among funds	<u>\$ (3,306)</u>	<u>\$ (5,011)</u>	<u>\$ 7,574</u>	<u>\$ 743</u>

13. Retirement

The federal employees of the Institution are covered by either the Civil Service Retirement System (CSRS) or the Federal Employee Retirement System

(FERS). The features of both of these systems are defined in published government documents. Under both systems, the Institution withholds from the salary of each federal employee the percentage of salary required; the Institution also contributes specified percentages. The cost of the programs for the year ended September 30, 1992 was \$13,021,000.

The Institution has a separate retirement plan for trust employees, in which substantially all employees of the trust funds are eligible to participate. Under the plan the Institution contributes stipulated percentages of salary which are used to purchase individual annuities, the rights to which are immediately vested with the employees. Employees can make voluntary contributions, subject to certain limitations. The Institution's cost of the plan for the year ended September 30, 1992 was \$7,285,000.

It is the policy of the Institution to fund the accrued costs of all plans currently. There are no unfunded prior service costs under the plans.

14. Income Taxes

The Institution is exempt from income taxation under the provisions of Section 501(c)(3) of the Internal Revenue Code. Organizations described in that section are taxable only on their unrelated business income. No provision for income taxes is required for the year ended September 30, 1992 since the Institution had a net loss from unrelated business activity.

It is the opinion of the Institution that it is also exempt from taxation as an instrumentality of the United States as defined in Section 501(c)(1) of the Code. Organizations described in that section are exempt from all income taxation. The Institution has not as yet formally sought such dual status.

15. Current Trust Funds Financial Activity

The financial activity for the current trust funds by fund type is as follows:

	(\$000s)					
	General purpose	Auxiliary activities	Special purpose	Total Unrestricted funds	Restricted	Total
Revenue and other additions:						
Government grants and contracts	\$ —	\$ —	\$ —	\$ —	\$42,689	\$ 42,689
